

TRC – Transfection Ready Cells

before the start:

- Carefully read the protocol.
- Equilibrate all media and buffer to room temperature.
- Cryopreserved cells are very fragile. Keep on dry ice before thawing and process quickly!
- Make sure you have a high-quality DNA preparation.

- 1 Thaw a vial of transfection ready cells in a water bath at **37°C** for **2 min**.
- 2 Transfer the cells into a **15 ml** centrifuge tube and add **8 ml** of recovery buffer.
- 3 Centrifuge for **4 min** at **80 xg** and cautiously aspirate the supernatant.
- 4 Resuspend the cell pellet in **10 ml** of transfection medium. Mix gently and incubate for **30 min** at room temperature.
- 5 The cells are transfection ready now and can be processed according to your protocol. The cells can be used directly for reverse transfection or seeded and let adhere overnight.

kit content

- TRC – Transfection Ready Cells (5x vials)
- recovery buffer (1x bottle)
- transfection medium (1x bottle)
- manual (1x)

storage

Store transfection ready cells below -140°C (mechanical freezer or liquid nitrogen). Store all media and buffer at 4°C.

limited product warranty

This warranty limits acCELLerate's liability to the replacement of this product. No other warranties of any kind, expressed or implied, including without limitation, implied warranties of merchantability or fitness for a particular purpose, are provided by acCELLerate. acCELLerate shall have no liability for any direct, indirect, consequential, or incidental damages arising out of the use, the results of use, or the inability to use this product. The product is for research only and must not be used for diagnostic or therapeutic purposes.

limited use license

TRC - Transfection Ready Cells are sold under a limited use license and must only be used instantly for transfection. No further expansion, passaging or refreezing of the cells is permitted. When breaking the sealed bag of the cells the user is explicitly accepting the terms of this limited use license
