

acCELLerate is an aspiring provider of innovative bioassays based on Assay Ready Cells. These frozen cell aliquots can be used instantly like a reagent and do not need to be cultured before. acCELLerate produces assay kits for a broad range of applications in research, safety assessment, and quality control to support new developments in pharma, cosmetics and food industry.

Lab Technician Cell Culture m/f/+

Your Responsibilities

You will work in our production facility in Hamburg to grow, expand and cryopreserve various mammalian cell lines for our catalogue products and customer projects.

This includes:

- Cultivation and expansion of mammalian cell cells.
- Assessment of cell morphology and growth properties.
- Cryopreservation of cells and production of „Assay Ready Cells“.
- General laboratory work.

Your Qualifications

- You completed a vocational training for laboratory technicians.
- You have experience with sterile work processes and the cultivation of animal cells.
- You have a keen perception and a self-organized and responsible approach to work.
- You have a friendly and open personality and like to work in a team.
- You are fluent in German and have good skills in English.
- You are self-motivated and willing to improve yourself.

At acCELLerate you'll be joining a spirited team. We are offering you a full-time permanent position with flexible work hours. You'll have the opportunity to become an expert in cell culture techniques working on various projects for our industry customers. Please send your convincing application including your salary expectations and your earliest starting date to apply@accellerate.me.
